EDUCATION

Manav Rachna University

Bachelor of Technology in Computer Science Engineering; CGPA: 8.29

Delhi NCR

July. 2017 – May 2021

Apeejay School

Senior Secondary School; CGPA: 7.4

New Delhi, Delhi

Apr. 2014 – Apr 2017

EXPERIENCE

Application Development Associate

June 2021 – Present

Accenture

Remote

- Worked with a team of software engineers to enhance client websites using Angular and SCSS, leading to increased traffic and user engagement.
- Implemented new features and design improvements on client websites, resulting in a more modern and user-friendly experience. Collaborating with team members to deliver high-quality work on tight deadlines and exceed client expectations.

Flutter Development Intern

May 2020 – August 2020

Aztlan

Remote

- Worked on the product Workpeer, a meeting management software that simplifies meetings.
- Worked on building and improving front-end for mobile and web experience. Was quick on doing multiple iterations of the design which helped the team to do a lot of a/b testing resulting in a great overall product.

PROJECTS

1RM Logger - Visit | *React, ExpressJS, MongoDB, TailwindCSS, Netlify, Git*

- Built a 1 Rep Max logging website using the MERN stack.
- Implemented features such as user authentication using JWT, and CRUD operations for managing workout logs, Implemented a dark mode feature, allowing users to toggle between light and dark themes for a more personalized and comfortable user experience.
- Created MongoDB database to store user and workout data, developed a Node.js/Express server to handle server-side routing and APIs for the application.

QKart - Visit | *React, Netlify, Git*

- A React.js E-commerce application. Implemented the core logic for authentication, shopping cart, and checkout.
- Improved UI by adding responsive design elements for uniform experience across different devices.
- Utilized REST APIs to load and render data served by the backend server dynamically. Deployed website to Netlify.

Covid19 Tracker - Visit | *Flutter, Git*

- Created an Android application using Flutter that serves as a Covid-19 tracker, displaying real-time data on cases, deaths, and recoveries for countries around the world.
- In-app resources or guides on how to protect oneself from the virus and what to do if one suspects they may be infected.
- Features: Smooth UI, Dark Mode, Pull to Refresh, Charts.
